

We will be conducting a two-day workshop on website development and design. The workshop will be divided into two parts, with the first part focusing on website development and the second part focusing on website design.

1. For the website development part, we will be teaching participants how to code in HTML, CSS, and JavaScript. They will also learn how to use different web development frameworks such as Bootstrap and Foundation. In addition, they will learn how to use different content management systems (CMS) such as WordPress and Joomla.

2. For the website design part, participants will learn how to use Photoshop and Illustrator to create stunning designs. They will also learn about different web design principles such as colour theory, typography, and layout. In addition, they will learn how to create responsive designs that look great on all devices.

The workshop will be held at any conference hall. The budget for the workshop is 5000 to 10000, which will cover the cost of the venue, food and drinks for the participants, and promotional materials.

We will need a minimum of 8 people to sign up for the workshop in order to make it viable.

We will promote the workshop through our website , social media and posters .
